1993 WHEEL ALIGNMENT

Chrysler Corp. Riding Height Adjustment

Jeep; Cherokee, Grand Cherokee, Grand Wagoneer, Wrangler

RIDING HEIGHT ADJUSTMENT

Before adjusting alignment, check riding height. Riding height must be checked with vehicle on level floor and tires properly inflated. Bounce vehicle several times and allow suspension to settle. Visually inspect vehicle for signs of abnormal height from front to rear or side to side. Check passenger and luggage compartments for extra heavy items and remove if present. If riding height difference from side to side is more than 1" (25.4 mm), check all suspension components and repair or replace as necessary.
