## HOW TO USE THIS CATALOG AND LOCATE PARTS

### MICROFICHE LAYOUT

Each Fiche is 4" x 6" and contains 288 Frames. There are 12 Rows containing 24 Frames in each Row. Each Row is identified by a letter in sequence running vertically from top to bottom. Each Alphabetical Row has 24 Frames running numerically from Left to Right from 1 to 24 inclusive. Therefore, each of the 288 Frames has an Alpha/Numeric Identification. Examples: A4, C20, etc.

The Color coded "Header Strip" of each Fiche identifies the Set (i.e. 1990 - Import), the Fiche Number (i.e. Fiche 1 of 5), the date of issue and the Groups contained within the Fiche.

### TO LOCATE PARTS

The Fiche is divided into Part Groups in which illustrations for parts of a similar function and/or location are published. The Group Contents Listing on the next Frame shows the type of parts contained in each Group. An Index to locate each Group is provided between each Text and Illustration Frame throughout the Fiche Catalog.

Several methods may be used to locate a specific part:

Option 1: From the Group Contents Listing, select the Group which would contain the part to be found. Refer to the adjoining Index to determine where the Group is located and locate the Group. Frame 2, following the Group Header, will contain an Index of illustrations. Select the Illustration most likely to contain the part. Refer to the Illustration and review the Illustration most likely to contain the part. Refer to the Illustration and review the Illustration and associated Text Information.

Option 2: If the "noun" name of the part you seek is known, an Alphabetical Index of Nouns and Illustration Titles, found on the last Fiche of the Set, is provided to assist in finding the part. Several keys may be found in this index.

**ABSORBER,** Rear . . . . . Group 17 - Group Reference

**AIR CLEANER,** Q Engine
24 Colt LC - 41 Summit LC . . . . . 2 - E4 - Fiche, Row and Frame Reference

**PEDAL,** Clutch . . . . . 1 - G8:12 - Fiche, Row and Frame, and Item Reference

**Fiche**
**Row and Frame**
**Item**

Option 3: If the part number is known refer to the Numerical Index on the last Fiche of the set, which will in turn refer you to the Fiche location of the item. Multiple references mean the part is listed more than once.

Option 4: A complete Index of Illustrations is included on each Fiche and can be referenced in the same manner as the Alpha Index.

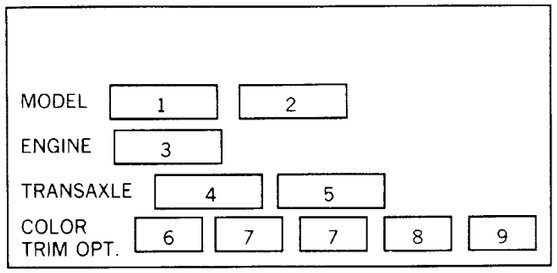
## VEHICLE INFORMATION CODE PLATE

Vehicle information code plate is riveted on the fender shield in the engine compartment. The plate shows model code, engine model, transmission model, and body code.

## BODY CODE PLATE

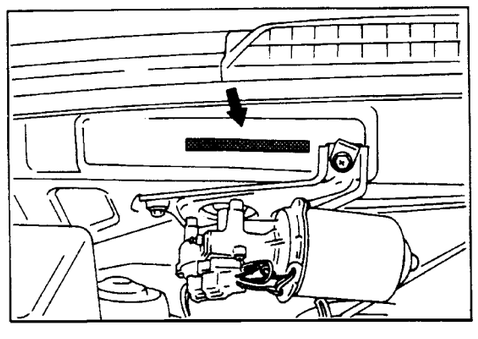


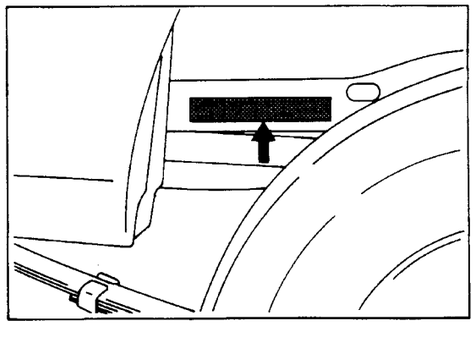
1. Vehicle Model
2. Classification Code
3. Engine Model
4. Transmission Model
5. Final Gear Ratio
6. Exterior Color Code (Monotone)
7. Exterior Color Code (Two Tone)
8. Interior Trim Code
9. Option Code

## CHASSIS NUMBER

### STAMPING LOCATION

The chassis number is stamped on the top center of the firewall located in the engine compartment or on other vehicles it could be stamped on sidewall of frame near right rear spring hanger.





## PAGE NUMBERING

Two part page numbers are used throughout this publication. The first part of the page number identifies the group and the second part of the sequence within the group. For example:
2-3 indicates Group 2, Front Suspension & Drive, Page 3.

In the maintenance of the Loose Leaf Parts Catalog it may be necessary to add information beyond the capacity of the page. If this should occur, and "A" page may be provided; e.g.: 2-3A should be filed immediately following page 2-3.

## ILLUSTRATIONS

Two part illustration numbers are used to locate the graphic in its proper sequence. The first part is the group number and the second part the sequence within the group. (Note: Illustrations will always be on the left hand page and will be an even numbered page).

A master index of all illustrations follows the INF Section. In addition, each group fly page includes a listing of the graphic illustrations contained within the group.

## ALPHABETICAL INDEX

To locate a part by name refer to the Alphabetical Index (located at the back of the catalog with page numbers prefixed "AL"). If the name of the particular item sought is not listed, or is unknown, look for the assembly in which it is contained or to which it is attached. The index refers to the graphic illustration which depicts the part.

## NUMERICAL INDEX

To locate a part by number refer to the Numerical Index (located at the back of the catalog with page number prefixed "NU"). This section contains a listing of all part numbers contained in the catalog with reference to their location.

## SPECIFYING INFORMATION

The following information is included in this catalog:

1. Part Name
2. Part Number
3. Quantity used per Vehicle
4. Model Application
5. Description and/or dimensions, colors, etc., for proper identification
6. Effective points for changes

## SYMBOLS USED IN THIS CATALOG

# preceding a part line key number indicates numbers not previously published.

AR indicates the quantity required may vary or is to be determined by the user.

PAR — Indicates (Paint As Required)

( ) around a part number following the item being specified indicates interchange with the new number for the part. Prior to ordering, check the current Master Parts List for the bracketed number and, if listed, order that number. Doing so will preclude delay in obtaining the part since the new number may not yet be available when the order is submitted.

## PRODUCT BULLETINS

Product Bulletins may be issued when important changes are made in production or when changes are to be made in a catalog between issues. It is important that catalogs be updated in accordance with information contained in Product Bulletins to insure accurate specifying.

## PARTS CATALOG REVISION SERVICE

Subscribers to the catalog service will be periodically provided with revision copy incorporating the latest information. Revision may be by Page, Group, or by complete book.

Proper interfiling of the revision copy will assure the subscriber of a complete up-to-date catalog.

## PART NUMBER PREFIX

Most Part numbers listed in the catalog are eight characters long and consist of two alpha followed by six numeric characters. Always use both alphas when submitting your parts order.

## KEY NUMBERS

Parts are listed in the text by the "key number" which identifies the item as depicted in the illustration.

When the "key number" is a combination; i.e.: "2-5," the part number is an assembly consisting of the referenced "key numbers" 2, 3, 4, and 5. If the "key number" appears as 2-5, 9 or 2-5 & 9, the part number contains 2, 3, 4, 5 and 9.

## DIMENSIONS

Dimensions listed in this publication are expressed in millimeters. To convert to inches multiply the value shown by .03937. (See Metric Conversion Table)

## BODY NUMBER

The Body Number for the Model 24, 41 passenger car is stamped on the right top of the fire wall in the engine compartment. The Body Number for the Model 27 Pick-ups is stamped on the sidewall of the frame near the rear spring hangar.

## ENGINE MODEL AND SERIAL NUMBER

The Engine Model is stamped adjacent to the Engine Serial No. on the cylinder block; Q Engine (1500cc is G15B for U.S./4G15 for Canada), K Engine (1600cc is G32B for U.S./4G32 for Canada); A Engine (2000cc is G63B for U.S./4G63 for Canada); F & W Engine (2600cc is G54B for U.S. 4G54 Canada).

The Engine Serial Number is stamped on top of the cylinder block at the right front corner.

## TRANSMISSION MODEL and SERIAL NUMBER

Mitsubushi transaxle and manual transmission serial numbers are stamped on the clutch housing. Chrysler built Automatic Transmission Identification numbers are stamped on the left oil pan side rail as follows:

| TRANS. ASSY. NUMBER | CHANGE CODE | DATE CODE | SERIAL NUMBER |
|---|---|---|---|
| 7 Digits | 1 Digit | 4 Digits | 4 Digits |
