This publication contains Parts information for all 1992-94 model year **Import Built Passenger Cars and Trucks** by Mitsubishi Motors Corporation. And also contains Parts information for the Summit by Diamond Star Motors.

The use of this Parts Catalog and the arrangement of information herein is explained in the General Information Section as indexed below.

HOW TO USE THIS CATALOG AND LOCATE PARTS

This Catalog is divided into Part Groups in which illustrations for parts of a similar function and/or location are published. The Group Contents listing on the next page shows the type of parts contained in each group. Tabs are provided or available to separate each group.

Several methods may be used to locate a specific part:

Option 1: From the Group Contents listing, select the group which would most logically contain the part to be found. Or open the catalog to Group 1, Master Group Illustration Index. Select the illustration group most likely to contain the parts associated. Turn to the Illustration Index in front of that group to select illustration and locate the part item numbers and associated text information.

Option 2: If the "noun" name of the part you seek is known, an alphabetical index of Nouns and illustration titles is provided to assist in finding the part. Several keys may be found in this index.

RESERVOIR Power Strng. Oil Pump. . . Group 19 — Group Reference
ALTERNATOR, 3.3L Engine. . . . . ..8-200 — Illustration Reference
STARTER. . . . . 08- 105- 1 — Illustration/Item Reference

Group

Item

Option 3: If the part number is known but the applications need to be determined, refer to the numerical index. This index shows the group, illustration number and item for each part listed in the catalog. Multiple references mean the part is listed more than once.

VEHICLE INFORMATION CODE PLATE

Vehicle information code plate is riveted on the fender shield in the engine compartment. The plate shows model code, engine model, transmission model, and body code.

BODY CODE PLATE

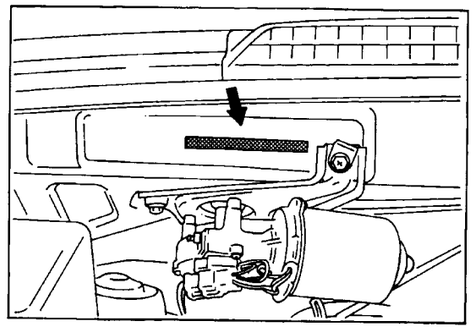

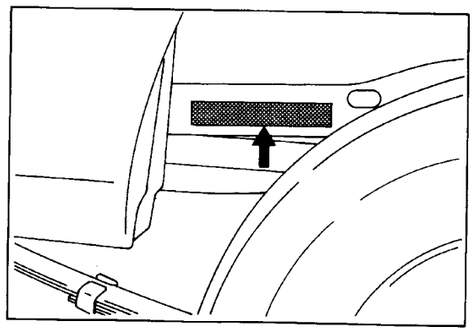

1. Vehicle Model
2. Classification Code
3. Engine Model
4. Transmission Model
5. Final Gear Ratio
6. Exterior Color Code (Monotone)
7. Exterior Color Code (Two Tone)
8. Interior Trim Code
9. Option Code

CHASSIS NUMBER

STAMPING LOCATION

The chassis number is stamped on the top center of the firewall located in the engine compartment or on other vehicles it could be stamped on sidewall of frame near right rear spring hanger.

PAGE NUMBERING

Two-part page numbers are used throughout this catalog. The first part of the page number identifies the group and the second part of the sequence within the group. For example:
2-3 indicates Group 2, Front Suspension, Page 3.

In the maintenance of the Loose Leaf Parts Catalog it may be necessary to add information beyond the capacity of the page. If this should occur, an "A" page may be provided; e.g.: 2-3A should be filed immediately following page 2-3.

ILLUSTRATIONS

Two part illustration numbers are used to locate the graphic in its proper sequence. The first part is the group number and the second part the sequence within the group. (Note: Illustrations will always be on the left hand page and will be an even numbered page).

A master index of all illustrations follows the INF Section. In addition, each group fly page includes a listing of the graphic illustrations contained within the group.

ALPHABETICAL INDEX

To locate a part by name refer to the Alphabetical Index (located at the back of the catalog with page numbers prefixed "AL"). If the name of the particular item sought is not listed, or is unknown, look for the assembly in which it is contained or to which it is attached. The index refers to the graphic illustration which depicts the part.

NEWPART INDEX

A listing of new part numbers contained in the catalog. The numbers are in group sequence with reference to the illustration and item number where the part is located.

NUMERICAL INDEX

To locate a part by number refer to the Numerical Index (located at the back of the catalog with page number prefixed "NU"). This section contains a listing of all part numbers contained in the catalog with reference to their location.

SYMBOLS USED IN THIS PARTS CATALOG

The following symbols are commonly used with Part Number and quantity information in this Catalog:

- Precedes a new part number to the catalog and remains in subsequent issues until stock is available for shipment.

AR - Indicates the quantity required may vary or is to be determined by the user.

PAR - Indicates Paint As Required.

( ) around a part number following the item being specified indicates interchange with the new number for the part. Prior to ordering, check the current Master Parts List for the bracketed number and, if listed, order that number. Doing so will preclude delay in obtaining the part since the new number may not yet be available when the order is submitted.

SPECIFYING INFORMATION

The following information is included in this Parts Catalog:

1. Part Name.
2. Part Number.
3. Quantity use per Vehicle.
4. Model Application.
5. Description and/or dimensions, colors, etc. for proper identification.
6. Effective points for changes.

PRODUCT BULLETINS

Product Bulletins may be issued when important changes are made in production or when changes are to be made in a catalog between issues. It is important that catalogs be updated in accordance with information contained in Product Bulletins to insure accurate specifying.

PARTS CATALOG REVISION SERVICE

Subscribers to the catalog service will be periodically provided with revision copy incorporating the latest information. Revision may be by Page, Group, or by complete book.

Proper interfiling of the revision copy will assure the subscriber of a complete up-to-date catalog.

PART NUMBER PREFIX

Most Part numbers listed in the catalog are eight characters long and consist of two alpha followed by six numeric characters. Always use both alphas when submitting your parts order.

KEY NUMBERS

Parts are listed in the text by the "key number" which identifies the item as depicted in the illustration.

When the "key number" is a combination; i.e.: "2-5," the part number is assembly consisting of the referenced "key numbers" 2, 3, 4, and 5. If the "key number" appears as 2-5, 9 or 2-5 & 9, the part number contains 2, 3, 4, 5 and 9.

DIMENSIONS

Dimensions listed in this publication are expressed in millimeters. To convert to inches multiply the value shown by .03937. (See Metric Conversion Table)

BODY NUMBER

The Body Number of the Model 24, 41 Passenger Car is stamped on the right top of the fire wall in the engine compartment. The Body Number for the Model 27 Pick-ups is stamped on the sidewall of the frame near the rear spring hangar.

ENGINE MODEL AND SERIAL NUMBER

The Engine Model is stamped adjacent to the Engine Serial No. on the cylinder block; Q Engine (1500cc is G15B for U.S./4G15 for Canada), K Engine (1600cc is G32B for U.S./4G32 for Canada); A Engine (2000cc is G63B for U.S./4G63 for Canada); F & W Engine (2600cc is G54B for U.S. 4G54 Canada).

The Engine Serial Number is stamped on top of the cylinder block at the right front corner.

TRANSMISSION MODEL AND SERIAL NUMBER

Mitsubushi transaxle and manual transmission serial numbers are stamped on the clutch housing. Chrysler built Automatic Transmission Identification numbers are stamped on the left oil pan side rail as follows:

TRANS. ASSY. NUMBER	CHANGE CODE	DATE CODE	SERIAL NUMBER
7 Digits	1 Digit	4 Digits	4 Digits
1234567	A	8577	0001
